Our key challenges for 2025

Gender inequality persists, yet many key actors now deny it exists. That's why we must:

- **strengthen the feminist agenda through high-impact campaigns**
- **develop strategies to counter misinformation and fake news**
- **monitor and reinforce public policies**

- **prevent regulatory setbacks**
- **provide data and arguments to key decision-makers**
- **engage with local governments and the judiciary**
- **raise awareness among broader audiences**

In 40 years of democracy, civil society in Argentina has played a crucial role limiting abuse of power and advocating for vulnerable communities.

This is a pivotal moment for women: we can continue to make progress or face a significant setback.

**We work every day to expand our impact.
Our goal is to lead efforts **to rebuild
consensus around gender equality
in Argentina.****

This is our moment to act.

**Join us in shaping
this transformation!**
